Medical Conditions Prone To Aggravation By Over Exposure: Individuals with known allergies, particularly to feedstuffs or enzymes as well as those individuals with chronic respiratory disease or particular susceptibility thereto and those with asthmatic conditions avoid contact with dusty conditions.

Primary Routes Of Entry: Ingestion and Inhalation, no appreciable entry known through intact skin although irritation possible, see above information concerning eye contact by surfactant component of product.

Emergency First Aid Procedures: Rinse mouth and throat with water if only mouth contact occurs. If ingested, give two glasses of water. Get medical attention. Do not give anything by mouth to an unconscious or

convulsing person. Wash affected area of skin with soap and remove contaminated clothing.

In Case Of Skin Contact: Wash affected area of skin thoroughly with soap and water and remove and wash contaminated clothing and equipment before reuse. If skin irritation persists after washing, seek medical attention.

In Case Of Inhalation: Remove from area of exposure; if allergic symptoms occur in 0-48 hours, seek medical attention. In case of unconsciousness occurs place patient stably in side position for transportation.
